Rejections Under 35 U.S.C. §103

Claims 1-4, 6, 9-16, 18-22, 24, 27-34 and 38-43 have been rejected under 35 U.S.C. §103(a) as allegedly being unpatentable over U.S. Patent No. 6,385,621 to Frisina ("Frisina") in view of U.S. Patent No. 5,767,848 to Matsuzaki et al. ("Matsuzaki"), both references being previously cited. (See Office Action, ¶4.) Applicants respectfully traverse the stated rejections as follows.

Applicants respectfully disagree with the Examiner's attribution of the elements of the claimed invention to Frisina and Matsuzaki as stated in the pending rejections and believe that the claimed elements are not found in the cited prior art references taken separately or

combined. Nonetheless, to expedite prosecution, the pending claims have been amended to further clarify the claimed invention.

With the amendments presented herein, independent claim 1 has been amended to include all the limitations of objected to claims 4 and 5 and independent claim 19 has been amended to include all the limitations of objected to claims 22 and 23. Claims 17 and 35 which were objected to for depending from a rejected base claim have been amended to be in independent form and incorporate limitations of any intervening claims (specifically, the limitations of claims 1 and 16 have been incorporated into claim 17, and the limitations of claims 19 and 34 have been incorporated into claim 35). Accordingly, Applicants believe independent claims 1, 17, 19 and 35 as presented herein, as well as any claims depending therefrom, are in condition for allowance.

New Claims 44 and 45

Independent claim 44 recites similar subject matter as that of claim 17 and independent claim 45 is a method claim counterpart to apparatus claim 44. Claims 44 and 45 are believed allowable for at least similar reasons as claim 17, including that the limitation noted by the Examiner on page 9, ¶ 6 of the Office Action is recited in claims 44 and 45.

Accordingly, as neither of Frisina nor Matsuzaki, taken alone or in combination, teach or suggests the claimed subject matter for at least the stated reasons, the invention as recited in independent claims 1, 17, 19, 35, 44 and 45 is believed patentable.

Dependent Claims

Applicants have not independently addressed the rejections of or objections to the remaining dependent claims because, as the independent claims from which the dependent claims depend are allowable for at least the reasons discussed *supra*, the dependent claims are

believed allowable for at least similar reasons. Applicants however, reserve the right to address such rejections should such response be necessary and appropriate.
